Windows Printer Setup Manual

To add a Stevens Tech printer on Windows 11.

Example: IP 155.246.119.21

Hostname mgtxerox01.mgnt.stevens-tech.edu

Model Xerox PrimeLink C9275

1. Open Terminal

Click **Start**, type **Terminal** and press **Enter**.

2. Find the printer hostname

Type this, using your printer's IP, and press **Enter**:

```
nslookup 155.246.119.21
```

Copy the hostname next to **Name:** Here it is **mgtxerox01.mgnt.stevens-tech.edu**.

3. Open Printers & scanners

Go to **Settings → Bluetooth & devices → Printers & scanners**.

4. Add the printer

1. Click **Add device**, then **Add manually**.
2. Choose **Add a printer using an IP address or hostname** and click **Next**.
3. Set **Device type** to **TCP/IP Device**.
4. Paste the hostname into **Hostname or IP address** and click **Next**.

5. Pick the driver

Choose **Xerox → PrimeLink C9275** and click **Next**. Not listed? Click **Windows Update** and check again.

6. Finish

Keep the name, choose **Do not share**, click **Print a test page**, then **Finish**.

If it doesn't print, check you are on the Stevens Tech network and the hostname is correct.
